Story introduction

A long time ago, the demons and their king, the Demon King, ruled the continent. However, the Demon King was defeated by the humans due to a certain incident, and the demons lost their king and their territory and began to migrate in large numbers to escape the humans’ hunt for their remnants. Even so, it was extremely difficult to escape the clutches of humans, and all races were driven to extinction.

Among the once-feared demons, there are now only six powerful apostles, and the demons are about to give up on survival, but suddenly pitch black darkness spreads over them. The demons decided to jump into the darkness to escape from the humans, but what they found beyond that was a dark world, a land where darkness and death spread.

The long-lived demons were surviving on a dead land where poisonous rain falls and crops cannot grow, but there are people who want to return to the land overflowing with life and light where humans live. The number increased as the days passed. One day, young demons who were born and raised on the Dark Continent returned to the surface and tried to communicate with humans in order to coexist with them, but the humans became frightened of the demons and the young demons were cut into pieces and died.

The demons were acutely aware that there was no place for demons in the world where light pointed to them, but as if to add insult to injury, the dark world also began to collapse. The demons, who could no longer do anything but wait to be exterminated, began to move to fight and win their lives, even if they were going to be destroyed anyway, and began preparations for a large-scale war.

The protagonist, Despolica, who has the appearance of a human girl despite being a demon, decides to join this war with her fellow demons to “conquer the world” in order to reclaim their world that was stolen by humans...

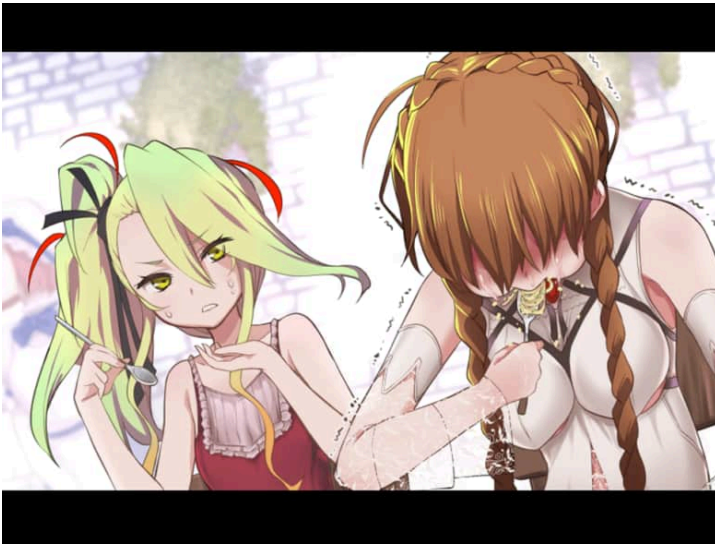

Impressions/Reviews

① Unique characters and dense scenario

The main goal of this work is that the protagonist, the demon Despolica, works with her friends and demons to gradually occupy human territory, defeat the Empire, the strongest nation on the continent, and conquer the world. The human race that lives in this world has the great power to eliminate demons, and has an overwhelming military force compared to the demons, who are on the verge of extinction. Furthermore, since demons are hated by humans, almost every nation stands in their way as their enemy.

The continental nations allied with the Empire, who oppose the protagonist and her fellow demons, often engage in inhumane acts. Among these, the treatment of enslaved humans is particularly atrocious. Once enslaved, humans are sent to slave camps, where they are thrown naked into nests of vicious monsters, and their desperate resistance is broadcasted worldwide as entertainment. Inhumane practices like these are rampant. The fear of the consequences for defying the Empire is deeply ingrained in humans, and many nations are manipulated by the Empire's desires. They employ all means to attack demons in order to destroy them.

In this battle, the protagonist Despolica and her companions all have unique personalities, making it easy to grow attached to them. The protagonist, Despolica, basically takes advantage of the fact that she looks like a human in order to expand the territory of the demons, and her main purpose is to infiltrate enemy countries and capture the kings and rulers alive to conquer the territory. It's a role.

However, perhaps because she had lived an oppressed life in the dark world for many years as a demon, when she sees humans being oppressed like slaves in the human world, she is unable to leave them alone and helps them even though she is a demon. The main character has a charming personality that makes you feel like you're in trouble.

Remnant Mobius, who is a demon like Despolica, is said to be the strongest swordsman among the demons, and has a personality that likes to fight against strong people. However, as the story progresses, Despolica's character becomes more virtuous, such as seeing how Despolica does not approve of cruel acts towards humans, and helping and sheltering humans who are about to be killed. He will also grow into better swordsman.

Ange, a slave knight who was enslaved after their homeland was defeated, initially harbors hostility towards the demons who threaten human lives for their own convenience. However, after witnessing a scene where demons, who are at risk of being killed, rescue humans whom the Empire treats as disposable, trampling their dignity like trash, Ange begins to cooperate with Despolica's group as their ally. The characters who become allies include a variety of unique individuals such as a serial killer and people from other worlds, making the scenario dense and filled with charm, making you eager to progress further and discover unfolding developments.

②Dynamic battles and fulfilling elements

This game has a symbol encounter system, and a battle starts when you come into contact with an enemy in a dungeon. Battles are fought using the traditional command selection method, and you will combine a wide variety of skills to devise strategies to face powerful enemies.

Characters who become companions acquire powerful skills called secret techniques through leveling up and events. Although the TP consumption rate is high, when activated, a powerful attack is activated along with a cut-in with a flashy effect, allowing you to enjoy dynamic battles that can quickly advance the battle to your advantage.

This work has a lot of elements to play , and the dungeon has hidden rooms and hidden items, so it has a charm that makes you want to explore every corner. Additionally, there are plenty of achievements that can be earned by defeating powerful enemies and fulfilling hidden conditions, making this work extremely fulfilling in terms of replayability.

③ Earn money by prostitution in the erotic kingdom

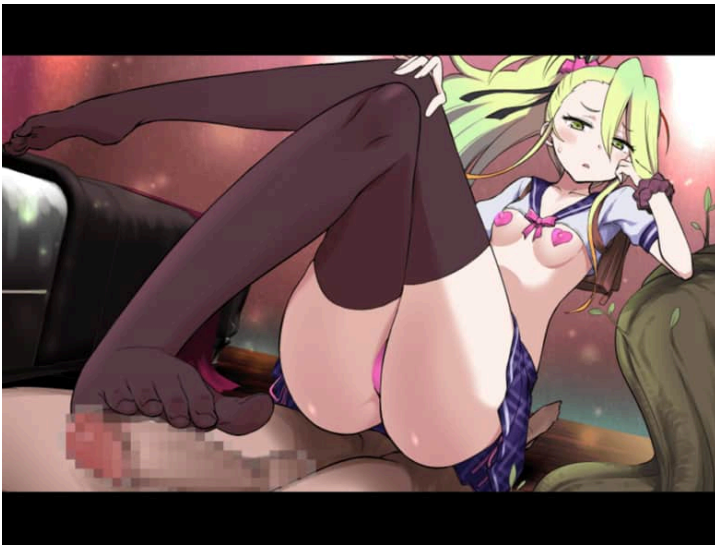

In order to deal with powerful humans, money and information are essential. The best place to solve such problems is a special kingdom called Doremi Fuckingdom. All kinds of information is bought and sold in this kingdom, and it is a facility where you can obtain information such as powerful equipment and hidden rooms using special currency that can be obtained by participating in erotic attractions in the kingdom. .

When entering this kingdom, it is customary to wear a special costume, and in the case of Despolica, she was forced to wear a costume with nipples and a modified sailor uniform, and in the case of the slave knight Ange, She will be cosplaying as a bunny girl .

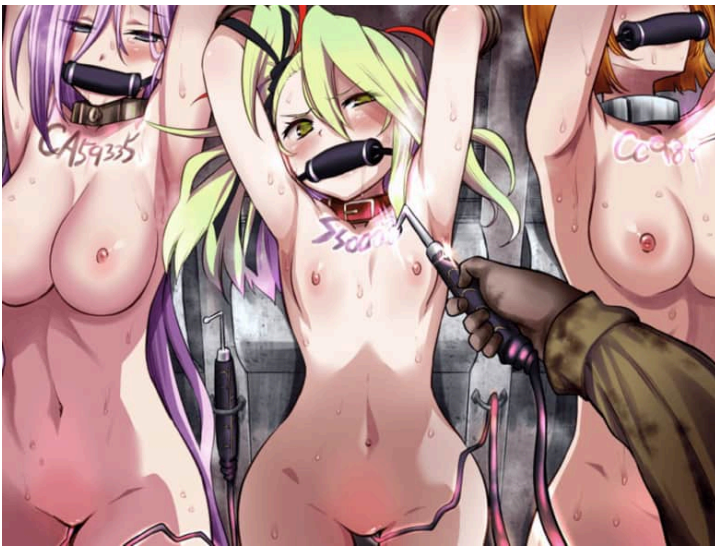

When participating in erotic attractions, you will need to consume items called spirit stones to spin the gacha. Depending on the result of the gacha, the clothes in the H scene and the man you are partnering with will change, so there are 3 different types of the same H scene. A special performance plays when you spin the gacha, and if you hit the SSR, you can get a large amount of coins.

In Despolica's case, she ends up servicing him with a footjob while riding a man at an attraction called Queen Castle. She has a sadistic personality, and while looking down on the man, she deftly moves her legs and handles his dick, leading him to ejaculate. In the case of SR, it will be a normal costume, and in the case of SSR, it will be footjob play completely naked.

In the case of Ange, it will be a titty fuck service using her big breasts that were noticeable even when she was wearing a regular costume. Also, although Ange is a former slave, she is a virgin because her previous master was incapacitated, but if she loses her virginity at a facility in the kingdom or at an event in the story, she will be able to receive more extreme play such as real play in the missionary position. You will be able to collect funds and information to fight against a powerful empire by prostituting your friends in a naughty kingdom.

④She was defeated and turned into a meat urinal in a slave camp...

If the main character is defeated by the enemy in battle, the game will not end immediately, but instead you will be sent to a slave camp to see the bad ending of how Despolica and her friends ended up as slaves. First, Despolica and her friends were taken to a slave camp and had their prisoner numbers engraved on their chests while a rod-like device was mercilessly thrust into their pussies as proof that they were prisoners.

The rod-shaped device has the effect of absorbing magical power and making the woman horny, and the woman is kept raped for a month in a facility called "Imashime Prison" where she is thoroughly raped over and over again. In the diary in the prison, you can see what kinds of abuses were carried out over the course of a month, and this diary is available to all of your companions.

Some of them have had their bodies modified, and in Ange's case, her body was given multiple doses of medication, which caused her breast milk to gush out, and she had to be fitted with a milking machine designed for dairy cows. It is almost impossible to escape from this prison, and it is rumored that the only way out is through a facility called the Execution Dungeon.

In the execution dungeon, extremely powerful monsters are wandering around, and the protagonists must face the challenge naked at level 1. The magic device in the execution dungeon allows you to obtain recovery items by listening to commands, but the commands are often sexual and are extremely humiliating, yet the scenes are broadcast nationwide. It will be. In Despolica's case, she was ordered to urinate in front of the device, and her body, which had been trained for a month, became excited just by urinating in front of a large group of people. She will be ended up climaxed.

Also, if you are defeated in the execution dungeon, you will be able to see the heroines' appearances until they are executed. In Despolica's case, she was publicly raped using a dildo with a 40 cm bull's dick while her body was restrained as bait to lure out the demons. She ends up living a miserable life, following the orders of enemy men in order to protect her captive kin.

In Ange's case, she ends up living as a slave prostitute who travels around the battlefield, and is raped by more than 30 soldiers every day in order to protect the knights of her homeland. She has a very thick vibrator inserted into her vagina and anus like a toy, and is made to deep throat by soldiers, and ends up spending her life fawning over men until she is officially executed.

⑤ Impressions/Reviews

Circle " Quick Nail Aristocrat " is a circle that produces doujin games such as " King Exit " and is characterized by long, long-playing RPG works . This work is a full-length RPG that took four years to create, and the content is extremely well-crafted, not only the game part but also the sex scenes.

There are two main types of H-scenes: the relatively erotic erotic scenes of prostitution within the kingdom, and the brutal rapes and rapes that take place in slave camps. In particular, I liked the sex scene in the slave camp, where you can see the portraits of the main character and her friends being completely humiliated, and the sense of despair that comes across as " There's nothing we can do...? " If you are not good at extreme scenes, you can rest assured that you can clear the game without any such events.

The game part is also full of content, with plenty of elements to enjoy, such as basic battles, exploration elements in dungeons, and achievement elements, and the difficulty level can be adjusted, so anyone can enjoy it. It becomes. After clearing the game, I played the entire game up to the second week's elements for about 30 hours. I think this is the perfect work for those who like doujin games that can be played for a long time and those who like humiliation games.

Q. Can't beat the enemy

When fighting against powerful enemies such as bosses, it is important to attract attacks with Ange. A strategy that uses skills such as " Backwater Shield " and " Pull Off " to evade enemy attacks is effective until the final stage. When it comes to equipment, prioritize evasion rate and elemental resistance, and get the treasure " Silver Spear of Wraith " available in Singana , as it increases evasion rate by 20% and is an excellent piece of equipment that can be used until the end of the game. Also, Despolica's overall buff skills such as " Nagi's Root " and " Loki's Thorn " are powerful, so make sure they don't run out.

In this game, recovery items can be obtained in abundance by exploring dungeons, etc., so you can use them without sparing too much, and the balance is just right. (Excluding spirit soul stones)

Sub-Event

- Treasure in the Dungeon

Talk to the slave man in Tortoise City and ask for information about the monsters in the dungeon.

Be careful as the monsters that appear in the dungeon are more powerful than before.

By investigating the wells in town, you can quickly get to the place where the treasure is.

After getting the treasure, check the toilet in the next room to go to the EX dungeon.

EX dungeons are random encounters, with high difficulty and strong enemies.

It's a bonus element that has nothing to do with clearing the main story, so if you can't win, put it off until later.

- Extremist Hideout

Speak to Scathach on the Shingana border to obtain the "Old Fort Bat Key".

Head to the room you couldn't enter in the Singana Old Fort.

You will be able to challenge the EX Dungeon Extremist Hideout.

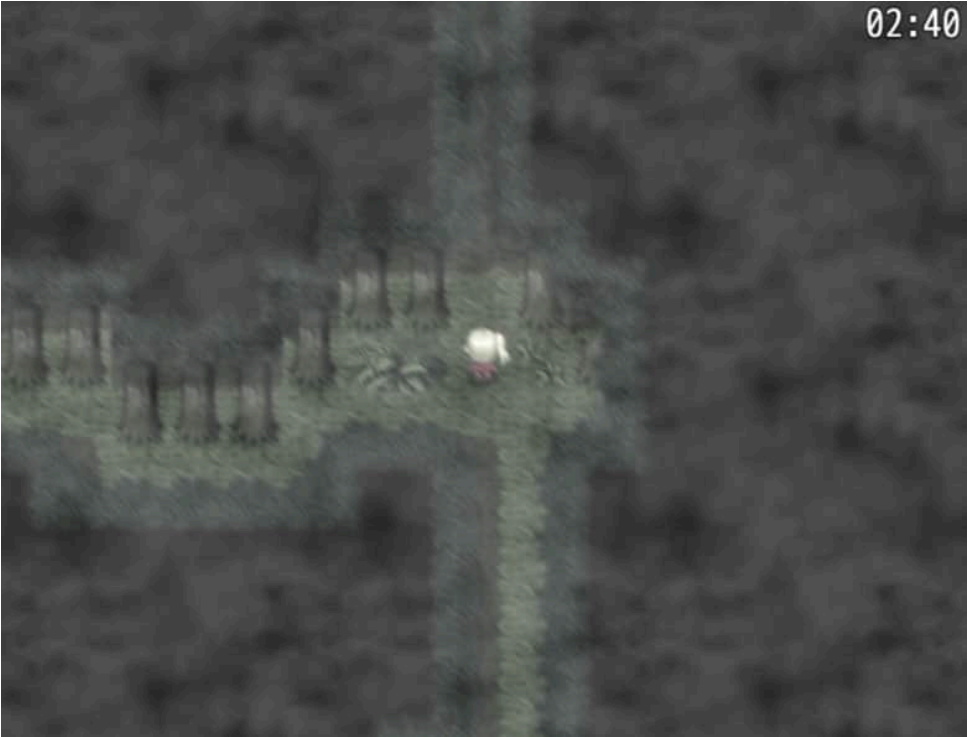

- Ange Rescue Event

When you enter Singana Forest, an event will occur where Ange gets separated.

If you can't rescue her within 3 minutes, an H scene "Failure to rescue Ange" will occur (loss of virginity)

Ange's location is north of the part in the image.

If the rescue is successful, she will receive " Spirit Stone x5 ".

Prana Trading Country

Once you enter the country, Remnant Mobius will join your party.
He goes to the slave market on the east side and after seeing the event he heads to the workshop.

Jinoo will inflict a poisonous state in battle and it will continue even after the battle, so treat it with recovery etc. Also, monsters that appear after this point are weak to wind attributes, so Coke's "Tail of the Wind" and Ange's "Wind Flash" are effective.

Talk to the cerebral gladiator in the north and get "Poison Fang x20".

Talk to the fallen gladiator in the southwest to receive "Poison Fang x5".

After handing over 100 poisonous fangs, you will collect 3 types of water in the next desert area.

While carrying the jar, your abilities will be weakened, so be careful when fighting enemies.

In the final jungle area, you will fight against the remaining 4 teams.

Since the enemy is waiting, you can easily aim for a back attack.

Be careful as you will be damaged if you touch the round protruding floor along the way.

When you reach the end, you'll be in a battle with a macho gorilla.

After you win, talk to Macho Gorilla to get a "Spirit Soul Stone".

House of Boheros

In order to aim for the emperor, she will next head to Ofe, the land of sacrifice.

When you go to the field map, a super beast will appear and you will be able to go to the Paro Mountains.

If you go to the Paro Mountains, you will get the achievement " Master of the World". If you're just going there, it won't be a battle, so let's get it.

Land of Sacrifice Ofe

You can see a sub-event with a mysterious man on the stone monument northwest of the entrance.

After watching the event with the super beast in the depths of the Sacrifice Mine, return to the city of the end.

When you head to the blind boy's place, there will be an event with Diana.

Collect 3 weeds in the same area and return to cure the dehumanization phenomenon.

Later, FBI agent Diana joins them. After that, obtain the " Watchtower Evacuation Exit Key " from her uncle .

She returns to the current Ofe Street and enters the underground evacuation passage through the west door.

Talk to the man near the cannon in the east of the area where the special magician is located to get the "Spirit Soul Stone".

If you check the showcase in the east area of the second floor of the watchtower, she will learn Diana's skill "Energy Drink".

If you go below the place where you learned the energy drink, she will be able to obtain the "Spirit Soul Stone". (Only after

suppression?)

When you try to enter the guest room, Sarasa suggests you to go to the ceiling on the left.
After the event, there will be a battle with the Emperor.
If you win, your companions will leave, and when you re-enter the room, you and Diana will proceed together.

After that, head to the warehouse on the second floor and go to rescue your friends on the stage with a smoke screen.
Despolica will be fighting alone, so try to avoid the enemies as much as possible.
If you go inside, you'll be in a battle with the Emperor.
The story will continue even if you lose this battle, but you will receive achievements if you win.
After that, you decided to head to the magical powerhouse Maximus.

Boss Kudan

It becomes stable if you fight while maintaining the physical counter state with the Akatsuki skill.

The counter chance is 50%, so don't neglect recovery.

It is recommended that you take precautions against lightning by equipping yourself with a lightning rod helm.

After dealing a certain amount of damage, you will be able to control two people using the power of fusion and separation.

Boss Breath Curse

The enemy's form changes every time you deal a certain amount of damage.

Many of the enemy's attacks are powerful, so using Ange's skills to attract attacks will make it easier to fight.

"Stupid Sword" is an all-out attack that even Ange's skills cannot attract, so don't forget to recover.

It is recommended to have Diana in your party, as she will periodically grant you a blessing status .

Last chapter

Escape from the assassin savior.

Proceed forward to a battle with the Black Tombstone (King Singana).

If you win, the item menu will no longer be available .

As you go deeper, you will be in a battle with the Black Tombstone (King of Books).

Lily Killer will join during the battle.

After victory, you will have a final battle with the Savior.

Since recovery items cannot be used, you will have to fight only with skills and magic.

We recommend replenishing TP with Cannibalus Plants and scraping with Bloody Rose.

If your MP is low, use Mei's Dew to recover it.

Even if you become unable to fight, the spirit stone in your pocket will restore you once.

If you win, you will enter the ending and get the achievement " DemonsRoots Cleared ".

After Clearing

After clearing the game, the following five benefits will be unlocked.

① Transfer play

By loading the data after clearing the game, transfer play becomes possible.

Most things such as equipment, items, and levels can be inherited.

You will be able to buy dress-up costumes from Fairy Costumes in Doremi Kingdom.

⑤ Author's comment:

Houses that cannot be opened in the EX dungeon "Monkey Kingdom"

Another Episode

Strong Enemy Location

Tortoise Palace: Synthetic Magical Creatures

It's a pretty tough opponent to take on in the first chapter.

You can get items to weaken him in Doremifa Kingdom, which you can go to later, so it is recommended to challenge him after that.

Its weak point is the water attribute, so if you take countermeasures with equipment and skills, you can fight to your advantage. If you win, you will receive the achievement " Defeating Magical Creatures ".

Torkia Dragon's Cave: Fafnir

In the cave at the end of the passage lined with dragons.

It's stronger than a dragon, and once you're here, it's tough to challenge.

It uses a lot of all-over attacks, so it's easier to fight if you dress Ange in something like the dragon king's cloak to attract enemy attacks.

If you win, you will receive the achievement " Defeating Fafnir ".

Magical Barrier Rukurukku Staff Room: Plant Magical Creatures

Located in front of the door in the northeast of the schoolyard.

It is weak to fire attributes, so Kalinka's Flame Gladius etc. are effective.

If you win, you will receive the achievement " Plant Magical Creature ".

Deep in the Paro Mountains: Super Beast Gon

can be fought in the deepest part of the Paro Mountains.

Although it is possible to fight against a very powerful opponent from an early stage, it is recommended to challenge it in the later stages.

It will inflict a stunner on everyone with its "Super Beast's Eyes", so be sure to take countermeasures with your equipment.

If you win, you will receive the achievement " Miraculous Victory ".

Command Room: Beyond the Mark 6

After defeating the boss in the Armageddon EX Dungeon "Brainwashed Soldier Area", speak to Brain Yellow and use the "Access Key" to proceed to the back of the left area of the Command Room to fight.

It will inflict a stun state, so be sure to counteract it with equipment such as Ange, who plays the role of a wall.

It is weak to lightning attributes, so attacking with corresponding equipment and skills will easily reduce its HP.

If you win, you will receive the achievement " Secret Weapon Destruction ".

3rd Empire Underground Waterway: Shark

After conquering the 3rd Empire, you can fight by boarding the small boat at the bottom left of the area where you proceed using the underground waterway transfer device.

It has a lot of HP, so be sure to raise your level and prepare your equipment before you challenge it.

If you win, you will receive the achievement " He was the one who touched the shark! ".

Sewers: Sludge Megaton

You can head to the sewers at the nursery before heading to the Reverse World Tree.

There is a hidden passage on the right wall near the entrance, and you can fight at the end.

During battle, it will become stronger the more you defeat Sludge, so refrain from attacking it entirely.

If you defeat it, you will receive the achievement " Defeating the King of the Sewers ".

Reverse World Tree: World Tree Bud

In the area on the left along the way.

If you win, you will receive the achievement " Defeating the World Tree's Bud ."

Reverse World Tree: Last boss (strengthened)

Opponent you can fight during takeover play.

If you examine the pillar before challenging the Reverse World Tree Singularity final boss, you can fight an enhanced individual.

The "Super Blessing" given at the beginning cannot be canceled even by Lost Innocent. The overall firepower has increased, and the "Stupid Tsurugi" attacks the entire enemy, ignoring Ange's attraction, so a certain amount of durability is also required.

If you win, you will receive the achievement " Super Blessing Defeat ".

Saint Colosseum: Tenka Taihei

If you enter the Saint Colosseum before the decisive battle with the Emperor in Chapter 4 during a takeover play, you can fight him.

After the message “Saving up power” appears, it will use a powerful attack called Tenka Katsuzai, so use Ange’s Aegis Storm, etc. to block it.

If you win, you will receive the achievement “ Defeating the Tenka Taihei .”

Throne of Destiny: Command Tower

In Another Episode, which can be played from the warehouse in Boheros’ mansion that can be accessed through takeover play, you can fight by heading to the throne in Boheros castle.

There are four enemies, each with boss-class HP and attack power.

While dodging enemy attacks with Ange, aim to defeat each one with Kalinka’s mission blows.

If you win, you will receive the achievement “ Settlement “.

Land of Fellowship: King

After defeating the Control Tower, you can fight at the door beyond the throne.

Since this is a very powerful opponent, you’ll want to prepare some status enhancements using fragment-type items and some spirit soul stones.

When a thunder-like sound and a flashing screen appear, the king unleashes an attack called the “Blade of Hope.”

It is difficult to withstand as you will receive about 10,000 damage from a certain attack.

It can be canceled by slipping it using Narjejita’s secret technique “Imperial Style Decimal Sword”.

Considering the possibility that you won’t be able to use the secret technique in time or miss the attack, equip Ange with her mother’s pendant (which withstands with 1 HP), and if she gets hit, use the spirit soul stone to rebuild her at once.

If you win, you will receive the achievement “ True Settlement “. Obtain the “ King’s Token ” from the treasure chest in the back.

EX Dungeon Section

The EX dungeon “Monkey Kingdom” is described in Chapter 4 of the story strategy.

EX Dungeon “Sludge Underground Cavern”

When you reach the end, you’ll be in a battle with 6x Sludge Cake.

Create a state where TP is easy to accumulate by turning roots, etc., and attack with Demon Roots to stabilize it.

If you win, you will receive “ Puyo Puyo x30 ” and the achievement “ Sludge Underground Cavern Conquest! ”.

About the Execution Dungeon

Basic procedure

An execution dungeon that can be challenged during BADEND.

When challenging this dungeon, Despolica and his friends are greatly weakened, and are now able to die in one hit from enemy attacks.

Despolica Lily Killer’s “Keru” is the only way to damage the enemy; other allies’ “Struggle” will not deal any damage at all.

Therefore, the basic idea is to protect Despolica and Lily Killer by “covering” them .

If you examine the red crystals on each floor, you will be able to obtain a "murky resuscitation potion" after the sex scene, and if you use it, you will be able to recover one of your allies who is unable to fight.

You can advance to the lower floor by obtaining the key located somewhere on each floor.

There are 20 floors in all, and there are no special items or achievements that can be obtained except for a few special battles at the bottom, so

there is no need to go all the way to the bottom, and it is extremely difficult to reach the bottom.

The person who posted the video below provides a very easy-to-understand explanation, so please use it as a reference for how to get to the bottom.

About the enemies that appear

- Maru

His action speed is fast and he can definitely make one person unable to fight with anything other than items such as "Rotten Dagger".

- Large enemies that appear on milestone floors such as Executioner 5 and 10F.

It requires 2 damage to defeat, and it uses an all-out attack. An opponent who needs two allies to protect them.

- Tori

It has a fast action speed and moves faster than an ally's cover, so it will be random who will attack you.

- Special Execution Participant

: He acts like he's grinning and doesn't attack, so you can defeat him unharmed.

- Premium Execution Participant

Shining soldiers will drop "Spirit Soul Stones" when defeated. It's a valuable item in the execution dungeon where you can fully recover everyone, so be sure to get it.

• Three Mitsugo appear at the same time. Since its action speed is slow, you can defeat it unharmed by using the "Discarded Scrolls" that you can pick up along the way, in addition to using Despolica, and Lily Killer.

- Ryu

Appears in the latter half of the floor. It takes 3 damage to defeat and releases an all-out attack.

Floor strategy information

If you choose the preferential execution participant's route above, you can break through the enemy locations blocking the path on B2F unscathed.

You can avoid one battle by going through the secret passage on B4F. Defeat the two enemies in the center and a key will appear in the bottom left.

You can get the key by defeating the executioner on B5F. Prepare two people to protect you.

You can explore the floor by passing through the hidden passage on B6F. "Dangerous Potion" is an item that can withstand heavy damage with just 1 HP.

A "premium preferential execution participant" is hidden at the bottom left of B7F, and when defeated, it will drop a spirit soul stone.

You can defeat it without any damage, so be sure to get it.

The real key to B8F is where you defeated the enemy in the upper left.
After defeating the monster in the lower right, there is a hidden passageway where you can pick up the "Discarded Scroll."

B9F
There are many hidden passages in this room, which can be broken through by fighting only the enemy in front of the key.

A key will appear if you go around the area on the right side of B12F several times around the area where the three figures are spinning.
 If it doesn't appear, it may appear if you walk around it a little.
 This is an area that can be penetrated without a battle.

You can get the key by going through the hidden passage on B13F .

The “Discarded Scroll” on the top left of B14F can be retrieved without a battle by going through a hidden passage. The monster blocking the key moves at regular intervals, so you can get the key without fighting.

You'll be fighting a dragon heading to the lower floor of B15F, so be prepared in advance.

If you go through the hidden passage on B16F, you can get the “Discarded Scroll”.

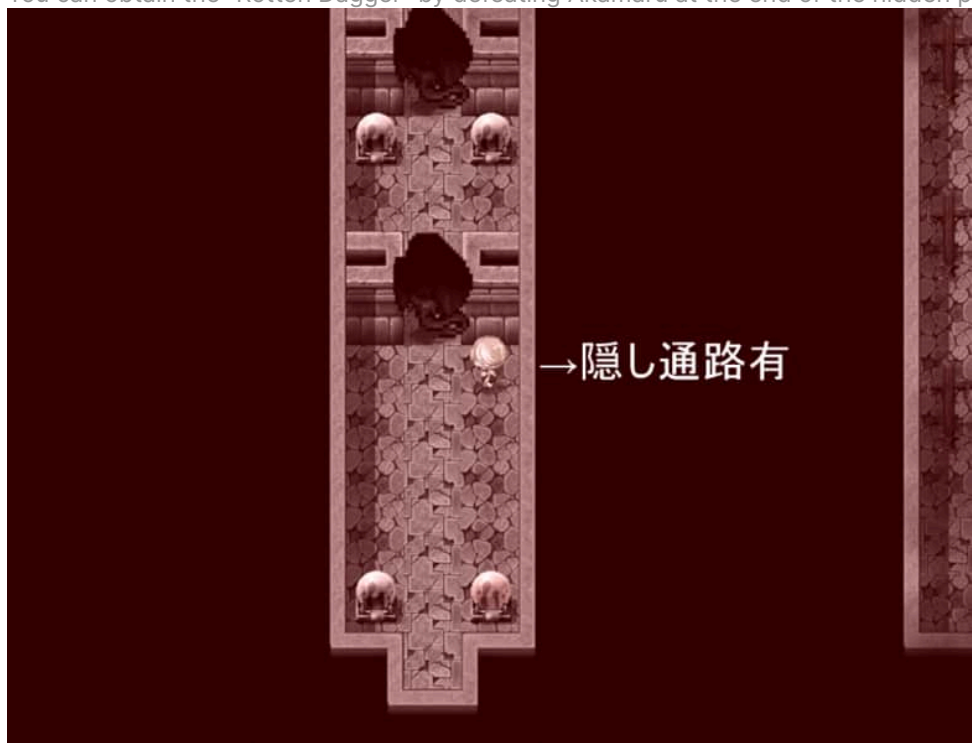

The red circle near the stairs on B17F will block the path if you pass the path to the left and right.
If you guide Akamaru many times on the left and right paths, it will disappear and you can pass through it without fighting.
After defeating the three bodies at the bottom left of B18F, there is a hidden passageway where you can get the key.

A “Premium Special Execution Participant” is hidden in the lower left of B19F, and when defeated, it will drop a Spirit Soul Stone.
There is a key in the center, but you won’t need it on the next floor, so there’s no need to go get it.

You can obtain the “Rotten Dagger” by defeating Akamaru at the end of the hidden passageway on B20F .
